PSI's Commitment to You

Meeting your pharmacy system needs for more than 30 years.

OUR HISTORY

For more than 30 years, Pharmacy Systems has been providing software applications to pharmacies in Michigan. With support from the Michigan Pharmacists Association and Pharmacy Services Inc., Pharmacy Systems created RxDotNet, a full-featured, cloud-based pharmacy application.

This platform has since benefited from the maturing of the Internet, resulting in drastically reduced costs as well as improved performance and reliability. The core of RxDotNet is intuitive, simple-to-use functionality, designed for flexibility and quick response to custom business requirements.

Continuous improvements to RxDotNet means that we grow with you.

YOUR PHARMACY. YOUR SYSTEM.
